

The top graph, labeled '作業A' (Work A), shows the relationship between the number of people (人数) on the y-axis and the number of days (日数) on the x-axis. The y-axis ranges from 0 to 100 in increments of 10. The x-axis ranges from 0 to 100 in increments of 10. A shaded blue area represents the range of values, which starts at a width of 10 at day 0 and decreases linearly to 0 at day 100. The upper boundary of the shaded area is a straight line from (0, 10) to (100, 0). The lower boundary is a series of curves that also start at (0, 0) and end at (100, 0), with the curves becoming steeper as the number of days increases.

The bottom graph, labeled '作業B' (Work B), shows the relationship between the number of people (人数) on the y-axis and the number of days (日数) on the x-axis. The y-axis ranges from 0 to 100 in increments of 10. The x-axis ranges from 0 to 100 in increments of 10. A shaded blue area represents the range of values, which starts at a width of 10 at day 0 and increases linearly to 100 at day 100. The upper boundary of the shaded area is a straight line from (0, 10) to (100, 100). The lower boundary is a series of curves that start at (0, 0) and end at (100, 100), with the curves becoming flatter as the number of days increases.
