

The figure consists of two vertically stacked line graphs. The top graph has a y-axis labeled '人数' (Number of people) and an x-axis labeled '人数' (Number of people). It contains several curves: a straight line with a negative slope, and several curves that are concave down, starting from the origin and peaking at different points. The bottom graph has a y-axis labeled '人数' (Number of people) and an x-axis labeled '人数' (Number of people). It contains three curves that are all concave down, starting from the origin and peaking at different points.
