

The top graph shows the relationship between time (시간) and various variables (Y-axis). The Y-axis labels are: 100, 90, 80, 70, 60, 50, 40, 30, 20, 10, 0. The X-axis labels are: 10, 20, 30, 40, 50, 60, 70, 80, 90, 100. The graph contains several lines, most of which show a decreasing trend as time increases. One line starts at 100 and decreases to approximately 30 at time 100. Another line starts at 80 and decreases to approximately 10 at time 100. A third line starts at 60 and decreases to approximately 0 at time 100. There are also lines that remain relatively flat or show a slight increase before decreasing.

The bottom graph shows the relationship between time (시간) and various variables (Y-axis). The Y-axis labels are: 100, 90, 80, 70, 60, 50, 40, 30, 20, 10, 0. The X-axis labels are: 10, 20, 30, 40, 50, 60, 70, 80, 90, 100. The graph contains several lines, most of which show an increasing trend as time increases. One line starts at 0 and increases to approximately 100 at time 100. Another line starts at 10 and increases to approximately 100 at time 100. A third line starts at 20 and increases to approximately 100 at time 100. There are also lines that remain relatively flat or show a slight decrease before increasing.
