

The top graph shows the relationship between time (시간) and various variables. The y-axis represents a value from 0 to 100, and the x-axis represents time from 0 to 100. The variables are: 100, 90, 80, 70, 60, 50, 40, 30, 20, 10, 0. The lines show that most variables decrease over time, with some showing a sharp drop after a certain point.

The bottom graph shows the relationship between time (시간) and various variables. The y-axis represents a value from 0 to 100, and the x-axis represents time from 0 to 100. The variables are: 100, 90, 80, 70, 60, 50, 40, 30, 20, 10, 0. The lines show that most variables increase over time, with some showing a sharp increase after a certain point.
