

The top graph shows the relationship between the number of people (人数) and time (時間) for a single activity. The y-axis represents the number of people, ranging from 0 to 1000. The x-axis represents time, ranging from 0 to 100. The curve starts at approximately 800, peaks at about 900 around time 10, and then declines to about 200 at time 100.

The bottom graph shows the relationship between the number of people (人数) and time (時間) for multiple activities. The y-axis represents the number of people, ranging from 0 to 1000. The x-axis represents time, ranging from 0 to 100. There are several curves, each representing a different activity. Some curves show a steady increase in the number of people over time, while others show a peak followed by a decline. The curves are labeled with numbers 1 through 10.
