

The top graph, titled '인구' (Population) on the y-axis, shows the relationship between population and several variables. The x-axis represents population, with labels: 100, 200, 300, 400, 500, 600, 700, 800, 900, 1000. The y-axis labels are: 100, 200, 300, 400, 500, 600, 700, 800, 900, 1000. The graph shows several downward-sloping curves, indicating that as population increases, the values of these variables generally decrease.

The bottom graph, titled '인구' (Population) on the y-axis, shows the relationship between population and several variables. The x-axis represents population, with labels: 100, 200, 300, 400, 500, 600, 700, 800, 900, 1000. The y-axis labels are: 100, 200, 300, 400, 500, 600, 700, 800, 900, 1000. The graph shows several upward-sloping curves, indicating that as population increases, the values of these variables generally increase.
