

The top graph shows a car starting at a distance of 100m and moving towards a distance of 0m. The y-axis is labeled '時間' (Time) and the x-axis is labeled '距離' (Distance). The shaded region represents the possible range of distances over time, and the blue line indicates the actual path of the car.

The bottom graph shows a car starting at a distance of 0m and moving towards a distance of 100m. The y-axis is labeled '時間' (Time) and the x-axis is labeled '距離' (Distance). The shaded region represents the possible range of distances over time, and the blue line indicates the actual path of the car.
