

Figure 1 consists of two graphs. The top graph shows the number of people (人数) on the y-axis (ranging from 0 to 100) and the number of days (日数) on the x-axis (ranging from 0 to 100). A shaded area represents the range of possible values, and a line represents the expected value. The bottom graph shows the number of people (人数) on the y-axis (ranging from 0 to 100) and the number of days (日数) on the x-axis (ranging from 0 to 100). A shaded area represents the range of possible values, and a line represents the expected value.
