

The figure consists of two line graphs. The top graph shows the relationship between the number of people (Y-axis) and the number of people (X-axis). The Y-axis is labeled '인원' (Personnel) and ranges from 0 to 100. The X-axis is labeled '인원' (Personnel) and ranges from 0 to 100. A blue curve starts at (0, 100) and decreases as the number of people increases, reaching approximately 20 at 100 people. A black curve starts at (0, 0) and increases to a peak of about 50 at 50 people, then decreases to about 20 at 100 people. The bottom graph shows the relationship between the number of people (Y-axis) and the number of people (X-axis). The Y-axis is labeled '인원' (Personnel) and ranges from 0 to 100. The X-axis is labeled '인원' (Personnel) and ranges from 0 to 100. A blue curve starts at (0, 0) and increases as the number of people increases, reaching approximately 100 at 100 people.
