

Figure 1 consists of two graphs. The top graph shows the relationship between the number of people (人数) on the y-axis and time (時間) on the x-axis. The y-axis ranges from 0 to 100, and the x-axis ranges from 0 to 100. A shaded region represents the area where the number of people is greater than or equal to the time. The bottom graph shows the relationship between the number of people (人数) on the y-axis and time (時間) on the x-axis. The y-axis ranges from 0 to 100, and the x-axis ranges from 0 to 100. A shaded region represents the area where the number of people is less than or equal to the time. Both graphs feature a series of curves that represent the relationship between the number of people and time.
