

Figure 1 consists of two graphs illustrating the relationship between the number of people (인원) and the number of people (인원) for different levels of the variable '인원' (인원).

The top graph shows the relationship for '인원' levels from E to K. The y-axis represents the number of people (인원) and the x-axis represents the number of people (인원). The graph shows a decreasing trend in the number of people as the level of '인원' increases.

The bottom graph shows the relationship for '인원' levels from K to E. The y-axis represents the number of people (인원) and the x-axis represents the number of people (인원). The graph shows a decreasing trend in the number of people as the level of '인원' increases.
