

The graph displays several data series over time. A prominent shaded blue area starts around 2000 at approximately 1000 people, rises sharply to about 6000 by 2005, and then declines steadily to near zero by 2010. This shaded region is bounded by two main lines: one starting at ~1000 in 2000 and rising to ~6000 in 2005, and another starting at ~6000 in 2000 and falling to ~0 in 2010. Other lines show various trends, such as a steady decline from ~6000 to ~1000, or a rise from ~1000 to ~3000.
