

Figure 1 consists of two graphs. The top graph shows the relationship between the number of people (X-axis) and the number of people who are not in the same group (Y-axis). The X-axis is labeled '사람의 수' (Number of people) and ranges from 0 to 100. The Y-axis is labeled '같은 그룹에 속하지 않은 사람의 수' (Number of people not in the same group) and ranges from 0 to 100. There are three curves: a straight line from (0, 100) to (100, 0), a curve starting at (0, 100) and ending at (100, 0) that is concave down, and a curve starting at (0, 100) and ending at (100, 0) that is concave up. The bottom graph shows the relationship between the number of people (X-axis) and the number of people who are not in the same group (Y-axis). The X-axis is labeled '사람의 수' (Number of people) and ranges from 0 to 100. The Y-axis is labeled '같은 그룹에 속하지 않은 사람의 수' (Number of people not in the same group) and ranges from 0 to 100. There are three curves: a straight line from (0, 100) to (100, 0), a curve starting at (0, 100) and ending at (100, 0) that is concave down, and a curve starting at (0, 100) and ending at (100, 0) that is concave up.
