

Figure 1 consists of two graphs illustrating the relationship between the number of people (人数) and the number of vehicles (台数) for different types of vehicles (自動車).

The top graph shows the number of people (人数) on the y-axis (0 to 100) and the number of vehicles (台数) on the x-axis (0 to 100). The shaded region represents the feasible area for different vehicle types. The curves represent the relationship between the number of people and the number of vehicles for each type of vehicle.

The bottom graph shows the number of vehicles (台数) on the y-axis (0 to 100) and the number of people (人数) on the x-axis (0 to 100). The shaded region represents the feasible area for different vehicle types. The curves represent the relationship between the number of vehicles and the number of people for each type of vehicle.
