

Figure 1 consists of two graphs. The top graph shows the relationship between the number of people (人数) on the y-axis and the number of people (人数) on the x-axis for different levels of the 'Jianli' (建设) index. The y-axis ranges from 0 to 100, and the x-axis ranges from 0 to 100. The graph shows a blue shaded area representing the range of possible values for the 'Jianli' index. The area is bounded by a horizontal line at y=100 and a diagonal line from (0, 100) to (100, 0). The area is divided into several regions by curved lines, each representing a different level of the 'Jianli' index. The bottom graph shows the relationship between the number of people (人数) on the y-axis and the number of people (人数) on the x-axis for different levels of the 'Jianli' (建设) index. The y-axis ranges from 0 to 100, and the x-axis ranges from 0 to 100. The graph shows a blue shaded area representing the range of possible values for the 'Jianli' index. The area is bounded by a horizontal line at y=100 and a diagonal line from (0, 100) to (100, 0). The area is divided into several regions by curved lines, each representing a different level of the 'Jianli' index.
