

Figure 1 consists of two graphs showing the relationship between the number of people (인원) and the number of vehicles (차량) for different vehicle types (승용차, 화물차, 택시, 버스, 트럭). The top graph shows the number of vehicles (차량) on the y-axis (0 to 100) and the number of people (인원) on the x-axis (0 to 100). The bottom graph shows the number of vehicles (차량) on the y-axis (0 to 100) and the number of people (인원) on the x-axis (0 to 100). Both graphs show a shaded area representing the range of possible vehicle counts for a given number of people.
