

The top graph shows the relationship between the number of people (人数) and the number of vehicles (台数) for different types of vehicles. The y-axis represents the number of people (人数) from 0 to 1000, and the x-axis represents the number of vehicles (台数) from 0 to 100. The curves show that for a given number of people, the number of vehicles required increases as the type of vehicle changes from乗用車 (passenger car) to バス (bus).

The bottom graph shows the relationship between the number of vehicles (台数) and the number of people (人数) for different types of vehicles. The y-axis represents the number of vehicles (台数) from 0 to 100, and the x-axis represents the number of people (人数) from 0 to 100. The curves show that for a given number of vehicles, the number of people that can be transported increases as the type of vehicle changes from乗用車 (passenger car) to バス (bus).
