

The top graph shows the relationship between the number of people (人数) and the number of times (回数) for different levels of difficulty. The y-axis represents the number of people, ranging from 0 to 1000. The x-axis represents the number of times, ranging from 1 to 10. The graph shows that the number of people increases as the number of times increases, with the rate of increase slowing down as the number of times increases.

The bottom graph shows the relationship between the number of people (人数) and the number of times (回数) for different levels of difficulty. The y-axis represents the number of people, ranging from 0 to 1000. The x-axis represents the number of times, ranging from 1 to 10. The graph shows that the number of people decreases as the number of times increases, with the rate of decrease slowing down as the number of times increases.
