

The top graph shows the relationship between the number of people (Y-axis) and the number of people who are not people (X-axis). The Y-axis ranges from 0 to 100, and the X-axis ranges from 0 to 100. The graph displays a series of curves that represent the relationship between the two variables. The curves are labeled with values from 0 to 100, indicating the number of people who are not people. The curves are concave down, showing that the number of people who are not people increases at a decreasing rate as the number of people increases.

The bottom graph shows the relationship between the number of people (Y-axis) and the number of people who are not people (X-axis). The Y-axis ranges from 0 to 100, and the X-axis ranges from 0 to 100. The graph displays a series of curves that represent the relationship between the two variables. The curves are labeled with values from 0 to 100, indicating the number of people who are not people. The curves are concave up, showing that the number of people who are not people increases at an increasing rate as the number of people increases.
