

The top graph shows a linear relationship between the number of people (人数) and the number of vehicles (車両数). The y-axis represents the number of people, ranging from 0 to 100. The x-axis represents the number of vehicles, ranging from 0 to 100. A blue line represents the linear relationship, and a shaded area represents the range of possible values.

The bottom graph shows a non-linear relationship between the number of people (人数) and the number of vehicles (車両数). The y-axis represents the number of people, ranging from 0 to 100. The x-axis represents the number of vehicles, ranging from 0 to 100. A blue curve represents the non-linear relationship, and a shaded area represents the range of possible values.
