

Figure 1 consists of two graphs. The top graph shows the relationship between time (横軸) and various variables (縦軸). The variables are ELL, EV, EF, HF, OF, UL, UF, and U. The curves show that ELL, EV, and EF decrease over time, while HF, OF, UL, UF, and U increase over time. The bottom graph shows the relationship between time (横軸) and various variables (縦軸). The variables are EOL, EOL, EOL, FOL, FOL, FOL, and F. The curves show that EOL, EOL, and EOL increase over time, while FOL, FOL, and FOL decrease over time, and F remains constant.
