

Figure 1 consists of two graphs illustrating the relationship between the number of people (인원) and the number of people (인원) for different levels of the variable '인원' (인원).

The top graph shows the relationship for '인원' levels from E to H. The y-axis is labeled '인원' (인원) and the x-axis is labeled '인원' (인원). The graph shows a decreasing trend as the number of people increases, with the rate of decrease being steeper for higher levels of '인원'.

The bottom graph shows the relationship for '인원' levels from F to H. The y-axis is labeled '인원' (인원) and the x-axis is labeled '인원' (인원). The graph shows a decreasing trend as the number of people increases, with the rate of decrease being steeper for higher levels of '인원'.
