

The top graph shows the relationship between the number of people (人数) on the y-axis and the number of vehicles (車両数) on the x-axis. The y-axis ranges from 0 to 100, and the x-axis ranges from 0 to 100. A series of blue curves are plotted, each representing a different level of a third variable. The curves are concave down, indicating that the rate of change decreases as the number of vehicles increases. The area under the curves is shaded light blue.

The bottom graph shows the relationship between the number of people (人数) on the y-axis and the number of vehicles (車両数) on the x-axis. The y-axis ranges from 0 to 100, and the x-axis ranges from 0 to 100. A series of blue curves are plotted, each representing a different level of a third variable. The curves are concave up, indicating that the rate of change increases as the number of vehicles increases. The area under the curves is shaded light blue.
