

The figure consists of two graphs illustrating the relationship between the number of people (인원) and the number of vehicles (차량) for different vehicle types (승용차, 화물차, 버스, 택시, 트럭).

Top Graph: The vertical axis represents the number of people (인원) and the horizontal axis represents the number of vehicles (차량). The graph shows five regions corresponding to the vehicle types, with the number of vehicles required increasing as the number of people increases. The regions are labeled with vehicle types: 승용차 (Passenger car), 화물차 (Truck), 버스 (Bus), 택시 (Taxi), and 트럭 (Truck).

Bottom Graph: The vertical axis represents the number of vehicles (차량) and the horizontal axis represents the number of people (인원). The graph shows five regions corresponding to the vehicle types, with the number of people that can be transported increasing as the number of vehicles increases. The regions are labeled with vehicle types: 승용차 (Passenger car), 화물차 (Truck), 버스 (Bus), 택시 (Taxi), and 트럭 (Truck).
