

Figure 1 is a line graph showing the relationship between the number of people (Y-axis) and the number of objects (X-axis) for different types of objects. The Y-axis is labeled '인원 수' (Number of People) and ranges from 0 to 1000. The X-axis is labeled '인물 수' (Number of Objects) and ranges from 0 to 100. Three lines are plotted: a top line labeled 'L1000', a middle line labeled 'L500', and a bottom line labeled 'L100'. All lines show a decreasing trend as the number of objects increases.
