

Figure 1 consists of two graphs. The top graph shows the relationship between the number of people (x-axis) and the number of people who are not people (y-axis). The x-axis is labeled '사람의 수' (Number of people) and ranges from 0 to 100. The y-axis is labeled '사람이 아닌 사람의 수' (Number of people who are not people) and ranges from 0 to 100. There are two curves: a blue curve that starts at (0, 100) and decreases to (100, 0), and a black curve that starts at (0, 0), increases to a peak of approximately 40 at x=50, and then decreases to (100, 0). The bottom graph shows the relationship between the number of people (x-axis) and the number of people who are not people (y-axis). The x-axis is labeled '사람의 수' (Number of people) and ranges from 0 to 100. The y-axis is labeled '사람이 아닌 사람의 수' (Number of people who are not people) and ranges from 0 to 100. There are two curves: a blue curve that starts at (0, 0) and increases to a peak of approximately 80 at x=50, and a black curve that starts at (0, 0), increases to a peak of approximately 40 at x=50, and then decreases to (100, 0).
