

Figure 1 consists of two graphs. The top graph shows the relationship between the number of people (X-axis) and the number of people who are not people (Y-axis). The X-axis is labeled '人数' (Number of people) and ranges from 0 to 100. The Y-axis is labeled '人数' (Number of people) and ranges from 0 to 100. A blue curve starts at the origin (0,0) and increases, eventually leveling off at a value of approximately 80 on the Y-axis. A black curve starts at the origin (0,0) and increases, eventually leveling off at a value of approximately 100 on the Y-axis. The bottom graph shows the relationship between the number of people (Y-axis) and the number of people who are not people (X-axis). The X-axis is labeled '人数' (Number of people) and ranges from 0 to 100. The Y-axis is labeled '人数' (Number of people) and ranges from 0 to 100. A blue curve starts at the origin (0,0) and increases, eventually leveling off at a value of approximately 80 on the Y-axis. A black curve starts at the origin (0,0) and increases, eventually leveling off at a value of approximately 100 on the Y-axis.
